SIDE EVENTS  Monday, 5 September 2022 Advancing Food Systems Action in the Face of Crisis

07:00 - 08:30 IFA Africa Forum
Breakfast meeting – By invitation only
Host: IFA
Venue: AD12

AGRICULTURAL DEALROOM
11:30 - 13:00 Developing value chains, boost investability to strengthen African food systems and increase local sourcing
Venue: AD10
Chair: IDH

This session will showcase how providing seed capital and TA to SMEs and farmers can lead to resilience and investability. It introduces the IDH value chain development program (VCD) highlighting how it contributes to the food systems transformation in Africa (Cassava & horticulture sectors), strategically partnering with off-takers to develop local sourcing through investment in SMEs and smallholder farmers.

The session will also showcase proven business models and innovations in value chain and sector development, highlighting pain points and practical solutions when investing in smallholder business models and value chains.

Moderator: Mr. CJ Fonzi, Partner, Dalberg
Panel discussion
• Mr. Cyril Ugwu, Country Director Nigeria, IDH
• Ms. Sylvie Nirere, Country Manager Rwanda, IDH
• Ms. Bunmi Akingba, CEO, FMS Farms Limited
• Mr. Faustin Mbundu, Chairman, Garden Fresh

AGRICULTURAL DEALROOM
14:30 - 15:30 Learnings from demand led approaches to value chain development
Venue: AD10
Chair: Agribusiness Dealroom

Currently an estimated 60% of key commodities consumed in Africa are sourced from outside of the continent – a huge lost opportunity for buyers of raw and processed agricultural commodities, African farmers and African economies and societies that benefit in many ways from increased local sourcing including increased investment, improved regional trade food security and job creation.

This session looks at business models and approaches taken by buyers, traders and value chain development / market facilitation organizations to increasing local sourcing in Africa. What works? What are the obstacles to scale and how can these be addressed? Insights and best practice will be shared from the following perspectives.

Moderator
• Mr. Omid Kassiri, Managing Partner, East Africa, McKinsey

Panel discussion
• Ms. Poorva Pandya, Head of International Relations, Research and Development, Empowering Farmers Foundation (EFF)
• Mr. Saint-Francis Tohlang, Corporate Affairs Director, Nestlé East & Southern Africa Region
• Mr. Kebba Colley, Director, inclusive business development, IDH, The Sustainable Trade Initiative
• Mr. Hemense Orkar, Vice President, Corporate Services, AFEX
• Mr. Yebeltal Getachew, CEO, East Africa, Twiga Foods
• Mr. Dimieari Von Kemedi, Managing Director, Alluvial
This session takes a deeper dive into the practicalities of driving real systems change through an integrated and holistic approach of collaboration with many different partners at a sector or country level.

The discussions will focus on using data to gain insights into agribusinesses at country or sector level and build innovative and scalable models for financing agribusinesses. Showcasing pilots from Uganda National Database, Ethiopia Dairy Sector, and AGRA’s Graduation Agri-SMES project.

Uptake of mechanized agricultural equipment for farming and post-harvest processing remains low in Africa. Statistics from the AfDB indicate that African farmers have 10 times fewer mechanized implements per farm area than farmers in other developing regions.

This session explores the obstacles to scaling mechanization in sub-Saharan Africa. It looks at emerging financing models, particularly lease financing and asks how these can be scaled. Business models for linking mechanization to farmer aggregation and offtake are also explored. Finally, the session presents learnings on policy instruments to encourage uptake of mechanization.

Moderator
- Ms. Hedwig Siewertsen, Head Inclusive Finance, AGRA

Panel discussion:
- Mr. Jehiel Oliver, CEO, Hello Tractor
- Ms. JudyAnne Wanjiku, MD, EFKen Leasing

AGRICULTURE DEALROOM

17:00 – 18:30 Bridging Capital Supply and Demand for Agri-SMEs: Challenges & Opportunities

Venue: AD10
Chair: AECF, ACELI, ROCKEFELLER

The Bridging Capital Supply and Demand for Agri-SMEs: Challenges & Opportunities session will convene leading actors to reflect on the barriers and opportunities to financing agricultural SMEs. Panelists will discuss how their organizations are approaching this market while identifying areas of growth and opportunity across both capital supply and addressable demand. The panel will shine a light on the recent traction that has emerged in the agri-SME finance market and reinforce this progress with a call to collaborate among the key actors and develop much needed enabling policies. The panel will include perspectives on impact priorities: gender and youth inclusion, food security & nutrition, and climate & environment.

Moderator
• Ms. Titianne Donde, Chief of Party for Feed the Future Rwanda Kungahara Wagura Amasoko

Panel discussion
• Ms. Nishdeep Sethi, Group Director of Structured Finance, African Guarantee Fund

Venue: MH4
Chair: Agribusiness Deal room and Finance Working Group
In-person

In recent years we have seen a growing effort to mobilize and support inclusive private and public investments in African agriculture with different levels of success. What has become evident is that unlocking agriculture investment opportunities will require a holistic and systemic approach that addresses multiple bottlenecks around a single investment or a portfolio of investments.

This session will be discussing how a joint effort and streamlined approach by critical stakeholders, including African governments, development partners, private sector, and other value chain actors, can build and promote a continental wide pipeline of inclusive investable business opportunities.

Moderator: Ms. Amandla Ooko-Ombaka, Economist and Associate Partner, McKinsey

Framing Remarks and introductory Remarks:
- Hon. Clare Akamanzi, CEO, Rwanda Development Board

Keynote Remarks:
- H.E. Emmerson Mnangagwa, President of Zimbabwe

Panel Discussion: Why do investments in agriculture remain below 5% of all investments on the continent despite all commitments and funds? Where is the mismatch?

11:30 - 13:00 Nourishing Urban Communities, Protecting our Planet – How Cities and Local Governments Are Pioneering Food Systems for the Future

Venue: MH1
Chair: Food Systems & Nutrition Working Group
Hybrid

This session will showcase cities and local governments striving to feed their populations with nutritious food, while also improving livelihoods, the environment, and the climate. Cities and local governments are often at the forefront of progress, and it may be no different in accelerating action for food systems transformation, with leading coalitions like the Milan Urban Food Policy Pact, C40 Cities, 100 Resilient Cities, Local Governments for Sustainability (ICLEI), and many more. What can we learn from examples of progress across the continent and the globe? How can we support their growth and overcome their challenges to accelerate sustainable transformation at scale?

Moderator: Ms. Betty Kibaara, Director, the Food Initiative, The Rockefeller Foundation, Africa Region Office

Welcome Remarks:
- Dr. Abebe Haile-Gabriel, Assistant Director-General, Regional Representative for Africa, FAO
- Hon. Pudence Rubingisa, Mayor, City of Kigali, Rwanda

- Ms. Josephine Favre, President, African Association for Vertical Farming (AAVF)
- Dr. Djimé Adoum, High Representative, Coalition for the Sahel
- Ms. Alice Ruhweza, International Regional Director – Africa, WWF

Closing Remarks
African Food systems are not on course to meet the SDG 1 and SDG 2 by 2030, and they are in need of urgent action to be transformed into a food system in which sufficient, healthy food is produced and delivered in a sustainable, inclusive way, by smallholder farmers (women and men) and a private sector that is operating in a robust enabling environment.

According to the State of Food Security and Nutrition in the World 2020 around 57% of the population in Sub Saharan Africa cannot afford a healthy diet and they rely more on staple foods and less on fruits and vegetables and animal source foods. Prevalence of undernourishment (PoU) in Africa is 19.1%, or more than 250 million undernourished people and will increase to 433 million people. Out of the 2 billion people suffering from food insecurity, 675 million in Africa. In 2019, 40% of stunted children lived in Africa.

The session will deliberate on how stakeholders can collaborate to enable Africa produce nutritious food sustainably. Some of the issues to be explored include climate smart technologies, last mile delivery initiatives and partnership with private sector.

14:30 - 16:30 Accelerating data-driven strategies for boosting food systems transformation
Venue: AD12
Chair: AgTech & Digitalisation Working Group
In-person

Agricultural data is the foundation of successful digital agriculture innovations – technologies, solutions, and services. The viability of digital agricultural technologies, solutions, and services depends largely on the quality of the data behind their operations. Above that, the digital transformation agenda of Africa will revolve around how reliable, trusted, and safe this resource across the continent is, considering the importance of agriculture to its economy. However, agricultural data across the continent is plagued with numerous challenges including duplication of data systems, unwillingness of data collectors to share data, farmers loss of control over data, insufficient regulatory guidance, capacity issues, among others.

The session will deliberate on how stakeholders can collaborate to enable agricultural data management at national/regional level through agricultural data infrastructure coordination.

Moderator: Mr. John Kamara, CEO, Adanian Labs

Framing Remarks:
- Ms. Marcella McClathey, Senior Program Officer, Bill and Melinda Gates Foundation

Fireside Chat:

AGRIBUSINESS DEALROOM
16:00 – 17:30 The Market is Africa: Driving Competitive Markets and Trade in Africa
Venue: Dealroom Marquee
Organizers: AGRA & AfCFTA Secretariat

The continent has recorded a major milestone with the ratification of the Continental Free Trade Area in 2019 and coming into force in 2021. The agreement presents a huge opportunity for access to the growing Africa market. This session will be discussing the key ingredients to expanding domestic and intra-continental markets as well as cross-border investments. Showcasing the opportunity, emerging actors, and infrastructure available, while looking into necessary investments to execute the free trade area.

16:00 – 17:00 Invest in Kenya
Venue: AD11
Organizers: Government Kenya Delegation

Presentation of Strategic investment opportunities targeted at private sector investors looking to set up operations or trade with the country, Development Finance Institutions supporting implementation of public projects, financial providers providing both debt and equity financing to ag-businesses and institutional investors financing large projects.

16:30 – 17:00 - Coffee Break
In 2021, African countries united behind a Common African Position on food systems transformation to achieve the 2030 Agenda, and more than two-thirds of them (37 African countries) developed national pathways customized to their unique contexts. In this plenary session, leaders from the global level, continental level, and countries will speak to the way forward and where the AGRF community must focus attention to support country progress. It will look at opportunities to unlock much-needed public and private finance for food systems transformation, as well as the latest efforts by the African Union to track and monitor progress, with the aim of driving continual country-level improvement for people, planet, and prosperity.

Climate Action through and for Food Systems
DAY 2 Wednesday, 7 September 2022 Climate Action through and for Food Systems

07:00 - 08:30 AGRF Partners Breakfast
By invitation only
Venue: AD12

09:00 – 13:00 Accelerating Climate Action through Food Systems
Venue: MH4
Chair: Resilience & Adaptation Working Group
Hybrid

The state of the Climate Africa (2020) report highlighted that Africa is in crossroads: The compounded effects of political instability, coronavirus disease pandemic, pest outbreaks and economic crises, exacerbated by the impacts of climate variability, were the key drivers of a significant increase in food insecurity. Most African countries will enter unprecedented hotter climates earlier in this century than generally wealthier, higher latitude countries, emphasizing the urgency for adaptation measures.

Africa needs to invest in curbing the effects of climate change through employing targeted policies in adaptation but also contributing to mitigation strategies. The objective of this session is to exchange lessons, best practices and policy dimension among global players that would contribute to climate change adaptation and resilience building and assess investment opportunities ensuring climate-resilient development in Africa, including in climate smart agriculture, hydrometeorological infrastructure and early warning systems to prepare for escalating high-impact events.

Moderator:
• Ms. Melissa Pinfield, Executive Director, Just Rural Transition

Moderator Wrap Up Remarks
Farmers across the African continent are being challenged to increase the resilience of their crops, farms, and livelihoods in the face of accelerating environmental degradation and tumultuous trade links. Balancing food and nutritional security, income stability, and a positive relationship with the natural world presents a compelling challenge, but a refreshed approach to how farmers use and think about crop cultivation may offer a path to true resilience and prosperity.

Regenerative agriculture recognizes that farmers live in harmony with their farms, and that the health of their cropping conditions is tantamount to the health of their crops. Offering a pragmatic framework of actions, from crop diversification, to agroforestry, and cover cropping, regenerative agricultural interventions offer farmers a broad spectrum of resilience outcomes, from hardier crops, reduced water intensification, and manifold biodiversity benefits. But chief among these outcomes – and central to their realization – is soil health. Building and preserving the health of soils provides immediate and long-term benefits to farmers and the food system, integrating regenerative practices as a first principle while acknowledging and championing the natural technologies contained within soils as the reactive area for healthy crops, predictable yields, and even soil-carbon sequestration.

09:00 – 13:00 Producing and Adding More Value in African Food Systems

Venue: MH3
Chair: Agribusiness Working Group
Hybrid

Agriculture in Africa has a massive social and economic footprint. More than 60 percent of the population of sub-Saharan Africa is smallholder farmers, and about 23 percent of sub-Saharan Africa’s GDP comes from agriculture. Yet, Africa’s full agricultural potential remains untapped. Realizing Africa’s full agricultural potential will require significant investment. Sub-Saharan Africa will need eight times more fertilizer, six times more improved seed,
at least $8 billion of investment in basic storage (not including cold-chain investments for horticulture or animal products), and as much as $65 billion in irrigation to fulfill its agricultural promise.

This session brings in key private sector players, financiers and development partners to agree on a roadmap to realise Africa's full agriculture potential.

In the AU Year of Nutrition, African governments and their partners have been challenged to ensure nutrition is at the forefront of priorities and action plans for COVID-19 response and recovery. A strong base of political will is present, as advancing healthy diets from sustainable food systems emerged as the #1 priority of African countries coming out of the UN Food Systems Summit, with more than 90% of countries including this in their national pathways for food systems transformation. But this is ambitious priority, requiring work not just on increasing productivity, but also on increasing accessibility, desirability, affordability, and sustainability. It requires leadership across the board, advocating for adequate financing, implementation capacity, and coordination to drive effective implementation.

With the leadership of First Ladies across the continent – drawing in coalitions from community to global level – this session will elevate and champion the transformative actions and investments needed to increase access to healthy diets today, while also protecting the environment and climate for the future.

Africa is not on track to meet the Comprehensive Africa Agriculture Development Programme (CAADPs) and the Sustainable Development Goal (SDG 2) targets to end hunger and ensure access to safe, nutritious, and sufficient food by 2025 and 2030 respectively.

Against this backdrop, The AGRF 2022 comes at a pivotal time, in Africa’s recovery and progress towards the attainment of sustainability and resilient agricultural-led economic transformation.

In order to fast-track actions toward national food systems transformation the Policy and State Capability Thematic platform will host the Ministerial Roundtable, convening the foremost leaders on the continent.

Moderators:
• Dr. Fadel Ndiame, CEO, Food Systems Transformation Solutions
• Mr. Sean de Cleene, Member of the Executive Committee, Head of the Future of Food, World Economic Forum

Speakers:
• H.E. Hailemariam Dessalegn, Chair, AGRF Partners Group and Former Prime Minister, Ethiopia
• H.E. Josefa Leonel Correia Sacko, Commissioner for Rural Economy and Agriculture, African Union Commission

14:30 – 16:30 Beyond the farm: Investment for innovation of food processing in Africa’s food system

Venue: MH1
Chair: Malabo Montpellier Panel, AKADEMIYA2063, Center for Development Research (ZEF) and Forum for Agricultural Research in Africa (FARA)
In-person

The post-harvest segments of African food systems hold great potential for income and employment generation, but much of that remains untapped. The ingredients for expanding these segments can be found in many African countries, including a large youth population that will enter the labour market in the coming decades, a vibrant SME sector operating in agricultural value chains (the ‘hidden middle’) and natural resources suitable for agricultural production to generate the required input into processing and retail. This event will discuss what innovations, investments and policies are needed to boost the performance of Africa’s food and agriculture sectors beyond production, including to add value through food processing, reduce post-harvest losses, increase supply-chain efficiencies and foster competitive integration in local and global markets. The focus will be on how to achieve an equitable transformation that benefits African small-scale producers and SMEs while ensuring their resilience in the face of current and future global crises and related supply-side shocks.

Moderator: Dr. Ousmane Badiane, Executive Chairperson, AKADEMIYA2063 and Co-Chair of the Malabo Montpellier Panel

Presentations
• Dr. Heike Baumüller, PARI Coordinator and Senior Researcher, Center for Development Research (ZEF), University of Bonn

Organizers: Government Ethiopia Delegation

**14:30 – 15:50 Tipping the balance: Opportunities in climate adaptation for African smallholder farmers and SMEs**
Venue: Dealroom Marquee
Organizers: AGRA/CASA/CRDB

Currently 95% of climate finance is supplied by public sources and allocated towards low-hanging fruit to mitigate climate change. To get beyond the low-hanging fruit the world will have to consider smaller investment opportunities that, in aggregate, can significantly adapt to climate change in Africa. If no action is taken, climate impacts in Africa will lead to overall yield reductions of up to 30% by 2050, while extreme weather events will result in higher post-harvest quality and quantity losses.

This session will explore how to effectively attract more funding to the agri-SME sector to achieve this aim while managing the risks.

11:00 - 13:00 Building Diverse and Nutritious Food Markets in Africa
Venue: MH4
In-person

Perhaps the most critical component of Food Systems in Africa, certainly the most visible to the majority of Households, is the Food Market. Households across the continent depend on food markets to provide them with access to nutrition. However, with recent disruptions caused by COVID-19 and the Russia-Ukraine war, how can we build diverse food markets that will secure our most vulnerable communities against malnutrition and undernutrition?

COVID-19 has exacerbated challenges to Africa’s food and agriculture sector and to its millions of smallholder farmers. At the same time, the pandemic has accelerated innovative efforts to develop and deploy the transformative power of digital technology to address these problems in ways that leapfrog past practices and traditional solutions.

This session will showcase the latest on new digital technologies and infrastructure developments targeted at farmers and SMEs across the continent.

Closing Remarks
The Global South has a majority of the world’s population and landmass, and, according to the OECD, may also account for a majority of world GDP by 2030. In this session, leaders from Africa, Asia and the Americas will share experiences, lessons and ambitions for the next phase of development. Cooperation is paramount, with the session revealing how countries in the Global South can forge, then leverage, closer political, economic, financial and cultural ties; solving shared problems while creating new opportunities.

Moderator Closing Remarks
Regional food trade is one of the pathways for Africa’s recovery. It can be a critical driver in building resilient food systems and an important engine for sustainable economic growth. The intended outcome of this session will be to gather commitments and encourage governments to align national and regional strategies and policies to support the successful implementation of the African Continental Free Trade Area. Furthermore, this session will also seek to gain commitment from development partners and private sector, to support the building of robust data systems to strengthen and inform food and nutrition security, trade policies, address constraints to food trade, and guide investment decisions in regional food value chains in Africa.

Closing remarks by the moderator
Heifer International is sponsoring the 2022 Pitch AgriHack Competition, targeting African businesses that bring technological innovation to the agriculture industry. The competition will identify and amplify efforts by young innovators to build resilience beyond COVID-19 through digital agriculture products and services. These innovations should be scalable and generate measurable impact in Africa’s food systems. Winners of the competition will receive funding and continued support to scale up their innovations into products that can help transform the entire sector.

In Africa, the population of young people is growing rapidly. In 2015, 226 million youth aged 15-24 lived in Africa. By 2030, it is projected that the number of youths in Africa will have increased by 42 per cent. Africa’s youth population is expected to continue to grow throughout the remainder of the 21st century, more than doubling from current levels by 2055. Agriculture provides the single most important platform for employment, income generation and food security and can drive poverty reduction through increased productivity, value addition and links to other sectors. The youth population has however not been well harnessed for Agriculture and food systems transformation. Most young people don’t often see a future in agriculture; they see it as a back breaking labour that is a preserve of the uneducated people. They also face series of hurdles, including access to land, finance, and other productive resources necessary to start a viable agriculture-based livelihood. This consequently leads to youth taking up agriculture as the last remedy amongst other business and employment opportunities.

Times of crisis are times of change. The past few years have been characterised by war, pandemics and extreme weather events. A shattered status quo means that new visions emerge, and as the dust settles the opportunity arises to rebuild in a way that learns from the past while looking to the future. We are in such a moment; this session debates how we react. Leading individuals from trade, development, health, finance and international civil society will discuss how to safeguard local, regional, national and international food systems, highlighting the opportunities that must be grasped and changes that must be made to build resilience for a more dynamic, more uncertain world in the midst of geopolitical and economic tumult.

Markets and Livelihoods
Innovation is critical to food systems transformation: Innovations in technology, climate mitigation and adaptation, inputs, alternative proteins and business models across the agricultural value chain abound. Yet many fail to go to scale, reflecting the systemic nature of agricultural value chains and food systems. This session looks at some of the common barriers to scale and discusses the role of innovation incubators, hubs and other models for knowledge sharing and scaling of innovation.

Welcome and Framing Remarks by the Moderator:

- **Mr. Sean de Cleene**, Member of the Executive Committee, Head of the Future of Food, World Economic Forum

The 2021 UNFSS highlighted multiple perspectives on the livestock sector. On the one hand, governments and development professionals stressed the numerous benefits that different livestock systems provide to the transformation of food systems in many countries. On the other, many focused on the harms of livestock systems to the environment and the health of humans. Livestock-derived foods are essential building blocks of balanced diets, yet they have a delicate interface with human health and the environment.

African countries' challenge is to foster a positive transition that contributes to food and nutrition security and livelihoods without damaging the environment or human health. This session will look at specific cases of livestock contributions to food systems transformation and draw out lessons learned in transforming the sector.

Moderator: Ms. Shirley Tarawali, Assistant DG, International Livestock Research Institute (ILRI) and Global Agenda for Sustainable Livestock (GASL)

Over 10 million young Africans join the labor force each year, yet the continent creates only 3.7 million jobs annually. By 2035, more young people will be entering Africa’s workforce each year than in the rest of the globe combined. There is an opportunity to reduce the unemployment rate by encouraging the youth to join the food systems as agripreneurs. Generation Africa has designed a youth in Ag Ecosystem development framework through Generation Africa. The tool will ensure that Governments are able to coordinate collaborative actions from different actors to focus on creating an enabling environment that will ensure the youth are accounted for in the development and inclusion.

Moderator: Mr. Simon Winter, Executive Director, Syngenta Foundation

Welcome and Framing Remarks:
• Mr. Dickson Naftali, Head, Generation Africa

Keynote remarks – Rwanda’s Perspective:
In his Wealth of Nations, published 1776, Adam Smith posed a famous paradox: why is water, so necessary for life, worth so much less than diamonds, which are not? Almost 250 years later, food markets remain some of the most essential, extensive and complex on earth. With insights from leading policymakers, researchers, experts and advocates, this session will unpack the critical role of food in development, highlighting new ways to think about food and food markets, the impact of subsidies and buying cartels, alongside strategies for resilience, sustainability, access, inclusion and organisation in food systems.

Moderator: **Mr. Roy Steiner**, Senior Vice President, Rockefeller Foundation

Keynote Remarks – The True Value of Food in Africa

- **Ms. Diane Holdorf**, Executive Vice-President, World Business Council for Sustainable Development

Panel Discussion:

- **Mr. Biendi Maganga-Moussavou**, Former Minister of Agriculture, Livestock, Fisheries and Food, Gabon
- **Hon. Dr Jeanne d’Arc Mujawamariya**, Minister of Environment, Rwanda
- **Dr. Lawrence Haddad**, Executive Director, GAIN

- **Ms. Suzanne van Tilburg**, Global Head F&A Networks, Rabobank
- **Ms. Cynthia Samuel-Olonjuwon**, Assistant Director-General and Regional Director for Africa, International Labour Organization (ILO)
- **Mr. Francois Nsengiyumva**, Managing Director and CEO, Kilimo General Business Ltd
- **Mr. Omid Kassiri**, Managing Partner, East Africa, McKinsey
The overall objective of the session is to discuss the risk – return trade off that informs the decision to invest, the cost of finance and sector allocation.

This session will also explore the ‘high risk’ label attached to agricultural investments and its gender and climate dimensions. We will also explore the need to maximize the de-risking instruments available in the market.
